KENDRO STUDIO EXPANSION

Kendro Studio

YouTube Auto-Upload Pipeline

5 AI Agents · 4 Discord Channels · Fully Automated Content Creation to Publishing

Kendro

Kodom

Yontro

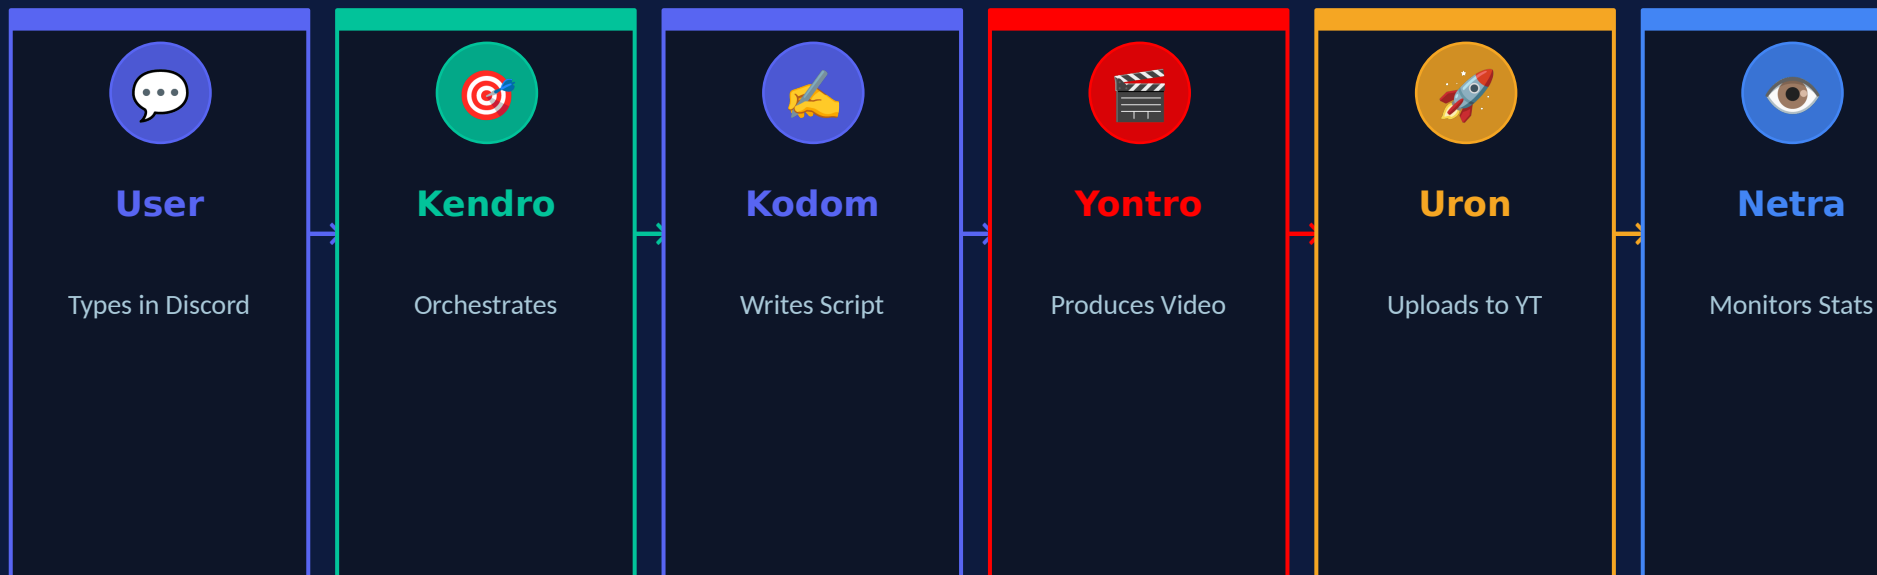

Uron

Netra

Kendro Studio Pipeline — Full Overview

From idea to published YouTube video — 100% automated, \$0 cost on free models

YouTube Auto-Upload

Uron publishes finished videos directly to YouTube — no manual steps, no human review required. Netra then tracks views, likes, and analytics.

The 5 Kendro Studio Agents

Kendro

DMs / general

\$0

 Llama 3.3 70B → DeepSeek

Master orchestrator. Listens in DMs and general. Routes tasks to the right specialist agent. Knows the full team and pipeline.

Kodom

#content-lab

\$0

 Llama 3.3 70B → DeepSeek

Content writer. Lives in #content-lab. Takes a topic from Kendro and writes a full video script ready for production.

Yontro

#studio

\$0

 OpenRouter → DeepSeek

Video producer. Operates in #studio. Takes scripts and produces video assets — titles, descriptions, thumbnails, timestamps.

Uron

#launchpad

\$0

 OpenRouter → DeepSeek

Publisher bot. Manages #launchpad. Schedules and auto-uploads finished videos to YouTube with full metadata.

Netra

#dashboard

\$0

 OpenRouter → DeepSeek

Analytics eye. Watches #dashboard. Monitors live YouTube stats and reports back on video performance to the team.

Discord Server — Kendro Studio Channels

4 dedicated channels under  KENDRO STUDIO category — each routes to its specific agent

YouTube Auto-Upload Workflow

How a single Discord message becomes a live YouTube video

01

User

User triggers pipeline

User types: "Ask Kodom to write a script about AI trends"

02

Kendro

Kendro orchestrates

Receives request, identifies intent, delegates to Kodom in #content-lab

03

Kodom

Kodom writes script

Generates full video script: hook, body, CTA. Posts to #content-lab

04

Yontro

Yontro produces

Creates title, description, tags, thumbnail prompt, timestamps in #studio

05

Uron

Uron uploads to YouTube

Connects YouTube API, uploads video with full metadata to channel

06

Netra

Netra monitors

Tracks views, CTR, watch time. Reports back in #dashboard with insights

Published on YouTube — automatically, with zero manual steps

How to Use Kendro Studio — Live Demo

Example Discord Command:

"Ask Kodom to write a script about AI trends"

1. Kendro hears it

Master bot picks up the message in DMs or #general

2. Delegates to Kodom

Routes the script task to #content-lab automatically

3. Script is created

Full video script posted back to the channel

4. Pipeline continues

Yontro → Uron → YouTube upload, Netra monitors

YouTube API integration:

Uron connects to YouTube Data API v3 to publish videos. Requires YouTube OAuth credentials added to OpenClaw Communications module.

Complete NMA IT Ecosystem — Everything Together

NMA IT — Core Support System

-   OpenClaw v2026.5.7
-   NMAIT-247Support Bot
-   Kendro Bot (main)
